

SAFETICURB DBG

+ Ductile Iron Grid Unit

Safeticurb is a long established, well proven linear drainage system with a discrete cross-fall which directs surface water to water inlet for hard landscapes areas and roadways. Substantially reduces the need for expensive underground pipework. Suitable for all hard landscapes surfaces and heavier duty options such as industrial sites. Discrete cross fall to direct surface water drainage entrances for hard landscaped areas and roadways.

Safeticurb is suited to car parks, pedestrianised areas, public highways, heavy duty industrial sites, airport taxiways and specialist industrial areas.

Details

Channel Material :	Concrete
Load Class :	D400 (40 Tonne)
Length :	915mm
Width (Internal) :	250mm
Depth (Overall) :	250mm
Weight :	106kg
Grating :	Ductile Iron Slotted Grid Unit
Accessories :	None
