

Pegasus

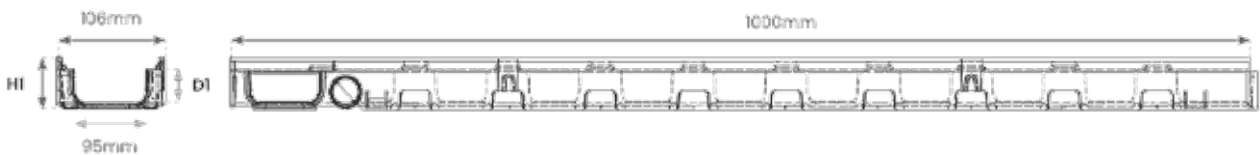

+ Sand Composite Channel and Grating

Pegasus is a simple, cost-effective way of draining surface water from home or domestic applications. The Pegasus channel is ideal for when you only have limited space to dig, with a width of 107mm and an overall depth of 49mm.

Being manufactured from polypropylene allows for a strong lightweight material, creating a quick and easy installation process, whilst also offering great strength and durability. The pegasus channel can hold up to A15 loading (1.5 tonnes) and is available in multiple different colours, highlighting why the pegasus channel is the perfect channel for any landscaping projects.

Details

Channel Material :	High Density Polyethylene
Load Class :	A15 (1.5 Tonne)
Length :	1000mm
Width (Internal) :	95mm
Depth (Overall) :	49mm
