

PARK 100

+ C250 Galvanised Slotted Grate

PARK 100 is a Heavy Duty Polymer Concrete drainage channel that bolsters a Galvanised Steel Edge Rail making this unit extremely tough and reliable for the vast majority of applications. Ranging from C250 to E600 this channel has many options and styles of gratings to choose from making it one of the most popular channels for its class. See the whole range for gratings selection. PARK 100 has a width of 139mm and offers a host of depths ranging from as low as 60mm all the way up to 250mm. Comes complete with a 1m length Ductile Iron Oval Slotted Grating. Suitable for 25 Tonne Loading (C250).
